Run NodeJS and MySQL app on Elastic BeanStalk

The screenshot displays the AWS Elastic Beanstalk console interface. The top navigation bar shows the AWS logo, a search bar, and the user's profile. The left sidebar contains a menu with options like Environments, Applications, and Change history. The main content area shows the details for the 'Lab5app1v1-env' environment, including its health status (Ok), running version (lab5-app1-v1-source), and platform (Node.js 16 running on 64bit Amazon Linux 2/5.6.1). Below this, a 'Recent events' table lists the environment's launch and availability. The bottom section of the console shows a 'Congratulations' message and a 'What's Next?' section with links to AWS Elastic Beanstalk overview, concepts, and deployment guides.

setuptools_rust: 1.5.2
rustc: n/a
=====DEBUG ASSISTANCE=====
```

error: can't find Rust compiler

If you are using an outdated pip version, it is possible a prebuilt wheel is available for this package but pip is not able to install from it. Installing from the wheel would avoid the need for a Rust compiler.

To update pip, run:

```
pip install --upgrade pip
```

and then retry package installation.

If you did intend to build this package from source, try installing a Rust compiler from your system package manager and ensure it is on the PATH during installation. Alternatively, rustup (available at <https://rustup.rs>) is the recommended way to download and update the Rust compiler toolchain.

This package requires Rust >=1.56.0.

Creating Lab5app2v4-env

This will take a few minutes. ..

- 3:29pm Successfully launched environment: Lab5app2v4-env
- 3:29pm Application available at Lab5app2v4.us-east-1.elasticbeanstalk.com.
- 3:28pm Instance deployment completed successfully.
- 3:28pm Instance deployment: You didn't specify a Node.js version in the 'package.json' file in your source bundle. The deployment didn't install a specific Node.js version.
- 3:28pm Added instance [i-052d7b582acb23580] to your environment.
- 3:27pm Waiting for EC2 instances to launch. This may take a few minutes.
- 3:26pm Environment health has transitioned to Pending. Initialization in progress (running for 2 seconds). There are no instances.
- 3:26pm Created EIP: 44.205.238.41
- 3:26pm Created security group named: aws-ec2-elasticbeanstalk-us-east-1-871818405897 as Amazon S3 storage bucket for environment data.
- 3:25pm createEnvironment is starting.
